

DISINFECTION CERTIFICATE

This document certifies that disinfection tasks have been performed, in bulk, using cold fogging method, to eliminate germs, bacteria and viruses (including coronas) in the house of **MRS LOLOSIDOU KORINA** - located at **PARAKOPI SYROS**.

Disinfection took place on **18/08/2020** and included:

The interior and exterior parts of premises.

The active substance used is Dalco-100 (1% chlorine dioxide).

NOTES:

The indoor application was performed in bulk, using the method of cold spray fogging – with ULV droplets to eliminate the microbial load.

The application was carried out outdoors on all surfaces, using a pressurized sprayer.

It is suggested to repeat the application in 15 days.
